About me

I am meticulous, responsible, and committed to following through on all tasks. I have a strong drive for learning and continuously developing new skills. Extremely motivated to grow professionally, I can work both independently and as part of a team, adapting quickly to new environments. I am seeking a position as a Front-End Developer, with opportunities for further development and career growth. I am eager to join a team of highly skilled developers, contribute to projects, and add value to the company.

Hobbies: self-development, sports, literature, travelling, activities, music.

Technical skills

- React, React Router, Redux Toolkit, Next.js
- Vue.js, Vuetify, Vue-testing-library, JEST
- Formik, Yup, Lodash, Axios, Immutable, ESLint
- JavaScript, ES6+, TypeScript
- REST API, i18n
- Investigation and debugging
- Code review
- English level – Upper-Intermediate
- HTML 5
- CSS3, SCSS, CSS-in-JS, Flex/Grid, BEM
- Bootstrap, React Bootstrap, MUI, AOS
- Git/GitHub/GitLab
- Gulp, Webpack
- Scrum/Agile (Jira, Confluence, ClickUp)
- Adaptive, responsive layout
- Graphics editors – Figma, Photoshop

Work experience

- 06.2025 – till now

Business Telecommunications & VoIP Gateway Provider

- Built the frontend of a large-scale multilingual platform from scratch, including a corporate website and a personal dashboard.
- Designed project architecture using Next.js (App Router) with react-i18next, combining SPA + SSG.
- Implemented registration, login, Google/Telegram authentication, and account linking.
- Developed a full-featured personal dashboard with analytics, balances, services management, top-ups/transfers, and an extended settings section (profile, personal data, email/password updates, security confirmations).
- Integrated React Hook Form + Yup, Redux Toolkit, RTK Query, and set up ESLint/Prettier, CI/CD pipelines, and deployment via Docker / GitHub Actions.
- Delivered a fully responsive custom UI based on Figma designs with animations and modern UX.

Stack: React, Next.js, Redux Toolkit, RTK Query, RHF, Yup, SCSS, Tailwind, react-i18next, Docker, GitHub Actions.

Methodology: Agile/Scrum (ClickUp)

- 07.2023 – 02.2025 (full-time)

QP

- Collaborating on CRM development: designing and implementing new components, enhancing existing features, and customizing solutions to meet business needs.
- Website development: building and adapting landing pages and complex website layouts with a focus on responsiveness and user experience.
- Identifying and resolving bugs.
- Mentoring newcomers.

Stack: HTML, CSS, JS, Vue.js, Vuetify, GitHub, Axios, Lodash, Jest.

Methodology: Agile/Scrum (Jira, Confluence).

- 09.2022 – 08.2023 (part time)

EXSY

- Development of functional and class React-Components using cutting-edge libraries and tools.
- Configuration of react-routes.
- Building and launching apps.
- Debugging code.

Stack: React, React Router, Redux-Toolkit, JS.

- 03.2021 – 03.2022 (part time)

Hillel IT

- Creation of interactive adaptive landings and web sites through the Rest API.
- Debugging code.

Stack: HTML, CSS, JavaScript.

Education

- 2024

EPAM

Front-end Fundamentals (JavaScript, TypeScript)

Front-end Specialization (React)

- 2021 – 2022

Hillel IT School

Front-end basic, Front-end pro

Certificates:
